

## HOW TO MAKE FRAMED SHELTERS

**Simple Frame**, this shelter is easy to make and you can use branches from trees, or a poncho or tarp.

**A Frame**, this shelter is more difficult to make and must have all the support braces secured to the frame (or it will wobble in the wind).

**A Lean-too**, this is very easy to make and is **the suggested design** for your shelter. You can cover the frame with a tarp, poncho, casualty blanket or branches.

**Snow Shelter**, a very good design if the snow is deep enough to dig in. Simply dig a trench, cover the top with logs, then branches, and cover all of it with more snow. Very warm and well insulated.
